

Facility: **Secure Shredding Facility**

Input Stream: **Secure Data and Confidential Paper**

Company: **Secure Paper (BPR Group), Purfleet, Essex**

In 2012 BPR Group invested in a confidential shredding unit and chose O.Kay Engineering to design, build and commission the plant. The new facility has enabled BPR Group to internalise all their customers' confidential waste and thus offer their customers a guarantee that all their confidential waste is shredded to the highest European standards. Furthermore, the facility enables BPR Group to divert 100% of their incoming material from landfill.

Bill Swan, Managing Director for BPR Group: *"The new unit has transformed the economics of our security shredding business. For the first time we can now sell the shredded material which means we can lower our prices and offer our customers a better deal. We would thoroughly recommend O.Kay Engineering to anyone else. They took time to understand us as a business, understand the industry, and above all they understand the equipment has to work day in day out for us to provide a service to our clients."*

O. Kay Engineering Services Ltd, Eagle Avenue, Magnet Park, Desborough, Northampton, NN14 2WD, United Kingdom.

Key Facts

Waste Type	Office secure destruction
Throughput	5tph
Recycling rate	100%
Output	Graded paper, cardboard. 100% Landfill diversion.
Key Equipment	Loading conveyor, bin lift, sorting line, Untha 4-shaft shredder, baler.

Lindsay Hall, Operations Director for BPR Group: *"We've been very happy with the plant, and the plant builder. We would definitely recommend O.Kay Engineering to anyone else looking to expand their security shredding business."*

As well as Secure Paper, BPR Group comprises PaperRound, a waste management and recycling company. The shredding line was installed adjacent to PaperRound's new MRF (also by O.Kay Engineering). BPR can now offer customers a total in-house recycling and confidential destruction solution for all their customers' office waste. The synergies of having the shred and sort line adjacent to one another are invaluable.

Life-long After-care, Servicing and Same-day Support

At O.Kay Engineering, we don't want to sell you just a new machine/plant and then disappear. We believe in life-long customer after-care, service and support. Whether you want just a friendly chat about the best way to maintain your equipment, or you would like us to come out and service your kit, you can call O.Kay Engineering around the clock and speak to an engineer within minutes.

For emergencies and breakdowns, we have our own modern UK manufacturing facility from which we run our large support fleet and from where we can respond quickly with the supply of parts and same-day solutions.
